SUMMARY

Python Developer specializing in Django and full-stack development, with experience building scalable applications such as AI-based virtual assistants, gesture control systems, and secure document solutions. Skilled in REST API development, database management, and backend optimization with strong problem-solving abilities.

WORK EXPERIENCE

Full Stack Backend Engineer (Python/Django + DevOps)

Nov 2025 - Present

SomniateTech

- Designed and deployed scalable backend systems using Python, Django REST Framework, and Node.js (Express.js), including HRMS, employee tracking, and real-time attendance solutions integrated with hardware sensors.
- Developed and optimized REST APIs for mobile applications, enabling seamless communication, authentication, and efficient data handling with improved system performance and reliability.
- Managed end-to-end DevOps and production deployment on VPS using Docker, Nginx, Unicorn, and SSL, ensuring secure, scalable, and high-availability applications.

Devops Intern

Aug 2025 - Oct 2025

Technoshrine

- Built and deployed an automated chatbot using n8n, integrating APIs and workflow automation to optimize business operations.
- Designed end-to-end chatbot workflows, improving automation efficiency and reducing manual intervention.

GEC Hackathon

Apr-2024

- Secured 1st position in the GEC Hackathon by developing a Women Safety application.
- Designed and implemented backend functionalities including real-time location tracking, user authentication, and emergency response features, ensuring reliability and scalability.

PROJECTS

Clients Project (Backend Dev)

- Architected and deployed HRMS, CRM, and TATA Project backends using Django and FastAPI, building scalable REST APIs with authentication and role-based access, supporting 50+ users and improving workflow efficiency by 30%.
- Developed and integrated AI chatbot (n8n), Face Verification, and Email Extraction systems, automating business processes and reducing manual effort by 40% through real-time data processing and API integrations.
- Led end-to-end production deployment on VPS (Hostinger) using Linux, Nginx, and Unicorn, optimizing server performance and ensuring 99% uptime with efficient resource management.

Personal Projects – AI & Full Stack

- Developed a Women Safety Application using Django, implementing real-time location tracking, emergency alert system, and secure authentication to enhance user safety and rapid response.
- Built an AI-based Animal Health Chatbot integrating image and text processing (HuggingFace API), delivering disease insights and medicine recommendations for intelligent animal care support.

TECHNICAL SKILLS

- Languages & Frameworks: Python, Django, Django REST Framework (DRF), FastApi, JavaScript, Reactjs
- Database & Backend: MongoDB, Firebase, PostgreSQL, MySQL
- Data Science & ML Libraries : NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn
- DevOps & Cloud: Linux, Nginx, Unicorn, Docker (basic), VPS Deployment, SSH, Server Management
- Tools & Platforms: Git, GitHub, Postman, VS Code, Hostinger, Netlify, Render

EDUCATION

Master In Computer Application- Gandhi Engineering College **BPUT** - 8 CGPA
